

# WHO IS INVOLVED?

The project is being driven by a **Management Team** comprised of two Trustees from each of the Trusts:

**For CCHT:**

Kate Armstrong  
Michael James (CCHT Chair)

**For CSSC:**

Janet Palmer  
Bronwyn Blair (CSSC Chair)

TOGETHER WE CAN GROW A  
**HEALTHY, SUSTAINABLE  
NORTHERN COROMANDEL PENINSULA**

The Management Team is assisted by the **Feasibility Study Team** comprised of:

Roy Fraser  
(Community Development Worker, CSSC)

Annette James  
(CCHT Trust Manager)

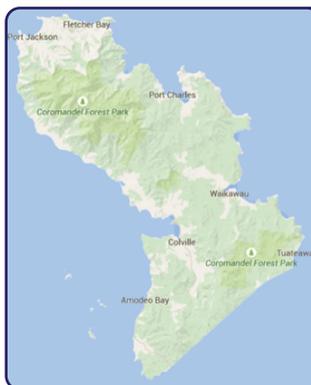

**Our feasibility consultant is:**

Ruth Hungerford  
(Momentum Research & Evaluation Ltd).

The Trusts also acknowledge the support provided to CSSC in this project by the **Department of Internal Affairs** through the granting of a Community Development Scheme (CDS) grant.

COLLECTIVE**

# the big picture:

## Why did we review the scope of the project?

The need for a targeted health facility remains, and has been clearly established and supported by our communities.

However, in addition, a thorough analysis of the census data from the last two census periods was conducted. This data was compared between the two periods and with the overall data from the Waikato Region. This process highlighted key trends and areas of need.

Consultation results, and feedback received over the past few years has also been analysed and needs and aspirations were identified from this process too.

## Needs the reviewed project scope responds to include:

- Remoteness, isolation and lack of access to services
- High levels of social deprivation
- A substantially aging population
- High levels of no or only school-level qualifications
- High increases in unemployment
- Low levels of existing industry
- High number of households within the low-income bracket
- High increases in the number of people whose income is derived from a government benefit or pension
- Low levels of available rental housing
- High increases in private rental rates and little access to social housing
- Poor access to telecommunications

# Working in partnership background:

Colville Community Health Trust (CCHT) has been working for over 8 years to build a targeted health facility in Colville Village. After working together informally for many years, in 2016, CCHT formally partnered with Colville Social Service Collective (CSSC) to strengthen the management team and further the project.

## New Strategic Direction:

In coming together, and in wanting the best outcomes for our communities the Trusts carefully considered the needs and aspirations of our communities, and developed a new shared vision and mission for the partnership.

## Our vision is to have:

Northern Coromandel communities that have the infrastructure to support the provision of services and opportunities which contribute to their long-term wellbeing & sustainability.

## Our mission as partners is:

To develop and build community facilities which enable ongoing community access to a wide range of services and accommodation options.

With the needs of our communities in mind, we have reviewed the scope of the project and widened it to address the health and wellbeing (especially of those with high needs such as the elderly), housing, education, and recreational needs of our communities. We have called it the 'Colville Community Facilities Project'.

## Where we are at now:

Thanks to Working Together More Fund and Trust Waikato we now have the funds to complete a Feasibility Study for the project.

TRUST WAIKATO  
TE PUNA O WAIKATO

There are two phases to the Feasibility Study. The first involves the completion of a formal feasibility study which includes consultation with all key stakeholders, research and targeted analysis to bring it all together.

The second phase relies on positive outcomes from the feasibility study. This phase involves detailing land arrangements, seismic assessment reports, concept drawings, project plans and the like.
